MAR 09 2012

Mr. Jerome N. Gregoire
Redbird Flight Simulations
8313 West Highway 71, Suite 100
Austin, Texas 78735

Dear Mr. Gregoire:

The Federal Aviation Administration (FAA) approved and authorized your TD BASIC device as a **Basic Aviation Training Device (BATD)** on June 29th 2010

The revised QAG identifying the TD BASIC (version 2.0) device is approved as requested. The TD BASIC version 2.0 is authorized for use in satisfying Tasks/Maneuvers and Procedures under the following sections of Title 14 of the Code of Federal Regulations parts 61 and 141:

**TD BASIC (version 2.0)**
**Basic Aviation Training Device**
**Non-Complex Single Engine Land**

| | | |
|---|---|---|
| Section 61.51(b)(3) | - | Logged Flight Experience |
| Section 61.57(c)(2) | - | Instrument Experience |
| Section 61.65(i)(2) | - | Instrument Rating: Not more than 10 hours |
| Section 61.109(k)(1) | - | Private Pilot Certificate: Not more than 2.5 hours in the introduction to the operation of flight instruments |
| Section 141.41(b) | - | Appendix C to 14 CFR part 141: Within an FAA-approved instrument rating course, but not more than 10 hours |
| Section 141.57 | - | Approved for use to the extent as allowed within FAA-approved special training curricula |

**This approval is contingent upon the following:**

1) This aviation training device must continue to maintain its performance and function without degradation to adequately perform the listed tasks/maneuvers or procedures;

2) A copy of this letter of authorization and approval must be posted in a visible location near the device when operated as authorized;

3) An authorized instructor must provide and certify the above instruction if used for certification or for an instrument proficiency check;

4) Any changes or modifications to this device which have not been reviewed, evaluated, and approved by AFS-800 will invalidate this letter of approval; and

5) The FAA reserves the right to revoke this authorization at any time if the Administrator determines that this training device is used contrary to FAA regulation or safety.

## Revision Page

| Revision No. | Date | Device |
|---|---|---|
| Version 2.0 | | Redbird TD BASIC |

**This revised certification will be valid for sixty (60) calendar months. Renewal can be made by letter of request to AFS-800. The above contingencies (1) through (5) must remain valid. AFS-800 will conduct at a minimum a "desk audit" before a renewal letter of approval will be provided.**

Sincerely,

Melvin O. Cintron
Manager, General Aviation and Commercial Division
